ADVERTISING

The growth of Ross County FC as an established Premiership football club has gone from strength to strength and there is no better time to showcase your brand at the Global Energy Stadium.

Stadium advertising is an extremely cost-effective method of promoting your business to a captive audience. With over 55,000 supporters attending home matches over the course of a season, our advertising packages provide your business with exposure to a growing supporter base. Coupled with this is the opportunity to engage with a wider national audience through television and digital outlets, such as Sky Sports, BBC

Scotland,
and major social media channels.

From static advertising boards located throughout the stadium in prime TV positions, to our state-of-the-art pitch side LED system, we can provide a bespoke advertising package to meet your business goals and deliver real value.

LED ADVERTISING

New for the 22/23 season, our state-of-the-art pitch side LED system provides businesses with the opportunity to display modern and vibrant advertising and deliver powerful brand messages.

Businesses taking advantage of our LED advertising will receive free production support to enable tailored adverts to be developed on a monthly, weekly, or game-by-game basis. This flexibility provides businesses with increased control and ensures relevant messages are displayed throughout the season.

LED adverts can be fully animated or static and developed in vibrant colour to make them eye-catching and impactful. Providing real-time messaging - with minimal production costs - ensures businesses achieve a higher return on investment.

With match highlights, goals and images posted regularly on our social media channels, the additional digital reach and engagement from LED advertising has never been greater!
